

Republican and Independent voters **overwhelmingly support** an all-of-the-above energy approach

that includes many policies championed by House Republicans in H.R. 1, the *Lower Energy Costs Act*, such as:

- Permitting and Regulatory Reform
- Securing America's Critical Mineral Supply Chain
- Improving Energy Infrastructure
- Responsible Development of U.S. Energy Resources
- Removing Barriers to Clean Energy Investment

Republicans and Independents Nationwide Support Provisions in H.R. 1:

83%

support an **"all of the above"** energy approach, which includes sources such as **nuclear** and **natural gas** as well as renewable energy sources like **wind, solar and hydropower**.

80%

favor **speeding up government review of energy infrastructure project** applications to **build more in America faster**.

77%

want to **streamline permitting** and **remove regulatory barriers** to make it easier extract and **process the critical minerals** in the United States.

87%

support making it easier to **develop the American minerals and resources** necessary for clean energy production in the U.S. and our allies.

85%

say **developing America's natural gas supplies** is critical to our **national security** and the planet is better off with more energy being produced in the U.S. because the lifecycle emissions of **American natural gas is 41% lower than that of Russia**.

79%

support **exporting more American-made natural gas** to meet demand, while **reducing global emissions**.

The CRES Forum survey was conducted March 8-9, 2023, by Moore Information Group. A total of 1,000 online interviews were conducted among a nationwide representative sample of self-identifying Republican and Independent voters. The potential sampling error is plus or minus 3% at the 95% confidence level.
